2025 – Lab Exam 03 Report

Student ID	It23728226
Batch	WD 6.1
Marking Guide	
1. Functionality: How well the core and bonus features are implemented	3
2. Creativity & User Interface Design: Clean and intuitive UI/UX design	2
3. Code-Quality & Organization: Code is well-organized & documented	2
4. Advanced Features & Data Persistence: Usage of SharedPreferences with one of the advanced features	3
Total Marks	10
Evaluator	

Description:

Habito is a wellness-focused Android app built with **Kotlin** and **Android Studio** to help users maintain healthy daily habits and emotional balance. The app features a **Daily Habit Tracker**, a **Mood Journal with Emoji Selector**, and a **Hydration Reminder** to encourage consistent selfcare.

With the **Habit Tracker**, users can add, edit, and delete daily routines such as exercising, meditating, or reading, and track their daily progress. The **Mood Journal** allows users to record how they feel using emojis and timestamps — and uniquely, users can **shake their phone to quickly add a mood entry** using the device's **accelerometer sensor**, making journaling fast and interactive. The **Hydration Reminder** uses notifications to remind users to drink water at chosen intervals.

All data, including habits, moods, and settings, are stored using **SharedPreferences**, ensuring persistence without the need for a database. Designed with a simple and calming interface, **Habito**

provides an engaging and user-friendly experience that motivates users to take small, meaningful steps toward a healthier lifestyle every day.
